Experience

Atlassian · Software Engineer

Mountain View, California · March 2019 - Present

- › Developed custom cross production expansion and integration experiences between Trello and Jira Software. Features include smart links / attachments and embedded cross join experiences to transition users from Trello to Jira
- › Developed engaging onboarding experiences for new cloud users of Confluence and Jira Cloud. Experiences include in-product messaging, product banners, onboarding checklist, find teammates, find workspaces, and guided tours highlighting core product features
- › Developed and enhanced onboarding components using React and Typescript. Components include tooltips, spotlights, banners, and onboarding checklist for use across other Atlassian applications
- › Identified drop off points and customer pain points of new user onboarding for Confluence and Jira Cloud. Developed product analytic dashboards to monitor and analyze traffic of new cloud user's first interactions with the product

Workday · Software Engineer

San Mateo, California · July 2017 - January 2019

- › Worked on enhancing and integrating our in house, high performance chart rendering engine throughout Workday's various applications. Exposed the core JavaScript library via TypeScript Bindings, React, and Java for easier library consumption
- › Developed core web components using React and TypeScript as part of Workday's migration from Google Web Toolkit to React. Components include progress bars, sliders, and toggles which are used throughout several Workday applications
- › Participated in a 6 month rotation program across iOS, Build and Automation Infrastructure, UI Web Client, and Cloud Platform Engineering teams

Wayfair · Software Engineering Intern

Boston, Massachusetts · June 2016 - August 2016

Developed internal SMS template tools to help business associates preview, test, and build custom SMS messages which are sent to customers in regards to order updates

Next Jump · Software Engineering Intern

New York, New York · June 2015 - August 2015

Designed, A/B tested, and implemented a new landing page onto Next Jump's Tickets Marketplace. Ticket transaction sales rose 3% within the first week on production

Skills
